/note="Yector: pHOS1; Site_l: Bst I; Constructed at The
Institute for Genomic Research (TIGR), Rockville, MD.
Genomic DNA isolated from broth cultures of E. histolytica
using a method described by Clark and Diamond (Clark,
C.G., and Diamond, L.S. (1993) Entamoeba histolytica: a
method for isolate identification. Exp. Parasitol.
77:450,). The DNA was mechanically sheared to give a
tight size distribution (~2 kb). The v + i method used for
the library construction is described in detail in Smith,
H.O. and Venter, J.C. (Making small insert libraries for
whole genome shotgun sequencing projects. In Genome
Sequencing: A Practical Approach, eds. M. Vaudin and B.
Barell, Oxford University Press, 1999)."

//lab host="E. coli XL-1 Blue"
//note="Vector: pAD-GAL4; At 20-25% parasitemia, blood was collected from BALB/CByJ mice infected with Py17XL
parasites, and leukocytes removed by passage over microcrystalline cellulose collumns. Total RNA was isolated using the guanidinium isothiocyanate method, and mRNA isolated using oligo(dT)-cellulose chromatography.
First strand cDNA synthesis was completed using a 50-base primer and reverse transcriptase in the presence of 5-methyl dCTP. After second strand synthesis, uneven termini were treated with Pfu DNA polymerase and EcoRI adaptors liqated to the blunt ends. The sample was cleaved with XhoI and separated on a Sephacryl S-500 column.
Size-fractionated cDNA was precipitated and ligated to HybrilaPa arms directionally using EcoRI-XhoI cleaved arms.
After packaging, the phagemid vector (pAD-GAL4) was excised from the HybrilaPa vector and plasmid DNA

/lab host="E. coli XL-1 Blue"
/note="Vector: pAD-GAL4, At 20-25% parasitemia, blood was collected from BALB/CByJ mice infected with Py17XL parasites, and leukocytes removed by passage over microcrystalline cellulose collumns. Total RNA was isolated using the guanidinium isothiocyanate method, and mRNA isolated using oligo(dT)-cellulose chromatography.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Size-fractionated cDNA was precipitated and ligated to HybriZAP arms directionally using EcoRI-XhoI cleaved arms. After packaging, the phagemid vector (pAD-GAL4) was excised from the HybriZAP vector and plasmid DNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              First strand cDNA synthesis was completed using a 50-base primer and reverse transcriptase in the presence of 5-methyl dCTP. After second strand synthesis, uneven termini were treated with Pfu DNA polymerase and EcoRI adaptors ligated to the blunt ends. The sample was cleaved with XhoI and separated on a Sephacryl S-500 column.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      isolated."

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               /// Clone_lib="Entamoeba histolytica Sheared DNA"
// Clone_lib="Entamoeba histolytica Sheared DNA"
// Clone_lib="Entamoeba histolytica Sheared CTIGR), Rockville, MD.
Institute for Genomic Research (TIGR), Rockville, MD.
Genomic DNA isolated from broth cultures of E. histolytica
using a method described by Clark and Diamond (Clark,
C.G., and Diamond, L.S. (1993) Entamoeba histolytica: a
method for isolate identification. Exp. Parasitol.
77:450.). The DNA was mechanically sheared to give a
tight size distribution (~2 kb). The v + i method used for
the library construction is described in detail in Smith,
H.O. and Venter, J.C. (Making small insert libraries for
whole genome shotgun sequencing projects. In Genome
sequencing: A Practical Approach, eds. M. Vaudin and B.
Barell, Oxford University Press, 1999)."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  /organism="Entamoeba histolytica"

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     mRNA isolated using oligo(dT)-cellulose chromatography, First strand cDNA synthesis was completed using a 50-base primer and reverse transcriptase in the presence of termini were treated with Pfu DNA polymerase and EcoRI adaptors ligated to the blunt ends. The sample was cleaved with XhoI and separated on a Sephacryl S-500 column. Size-fractionated cDNA was precipitated and ligated to HybriZAP arms directionally using EcoRI-XhoI cleaved arms. After packaging, the phagemid vector (pAD-GAL4) was excised from the HybriZAP vector and plasmid DNA isolated.

/note-"Vector: pAD-GAL4; At 20-25% parasitemia, blood was
parasites, and leukocytes removed by passage over
microcrystalline cellulose collumns. Total RNA was
isolated using the guanidinjum isothiocyanate method, and
isolated using the guanidinjum isothiocyanate method, and
first strand cDNA synthesis was completed using a 50-base
primer and reverse transcriptase in the presence of
primer and reverse transcriptase in the presence of
5-methyl dCTP. After second strand synthesis, uneven
termini were treated with Pfu DNA polymerase and EcoRI
adaptors ligated to the blunt ends. The sample was cleaved
with XhoI and separated on a Sephacryl S-500 column.
Size-fractionated cDNA was precipitated and ligated to
HybriZAP arms directionally using EcoRI-XhoI cleaved arms.
After packaging, the phagemid vector (pAD-GAL4) was
excised from the HybriZAP vector and plasmid DNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            /organism="Plasmodium yoelii yoelii"

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    /note="Vector: pAD-GAL4; At 20-25% parasitemia, blood was collected from BALB/cByJ mice infected with Py17XL parasites, and leukocytes removed by passage over microcrystalline cellulose collumns. Total RNA was isolated using the guanidinium isothiocyanate method, and mRNA isolated using oligo(dT)-cellulose chromatography. First strand cDNA synthesis was completed using a 50-base primer and reverse transcriptase in the presence of 5-methyl dCTP. After second strand synthesis, uneven termini were treated with Pfu DNA polymerase and EcoRI edaptors ligated to the blunt ends. The sample was cleaved with XhoI and separated on a Sephacryl S-500 column. Size-fractionated cDNA was precipitated and ligated to HybriZAP arms directionally using EcoRI-xhoI cleaved arms. After packaging, the phagemid vector (pAD-GAL4) was excised from the HybriZAP vector and plasmid DNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     /dev_stage="Asexual blood stages"

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Conservative
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   mRNA isolated using oligo(dT)-cellulose chromatography. First strand cDNA synthesis was completed using a 50-base primer and reverse transcriptase in the presence of 5-methyl dCTP. After second strand synthesis, uneven termini were treated with Pfu DNA polymerase and EcoRI adaptors ligated to the blunt ends. The sample was cleaved with XhoI and separated on a Sephacryl S-500 column. Size-fractionated cDNA was precipitated and ligated to HybriZAP arms directionally using EcoRI-XhoI cleaved arms. After packaging, the phagemid vector (pAD-GAL4) was excisted from the HybriZAP vector and plasmid DNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            isolated."

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           301-838-0208
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   microcrystalline cellulose collumns. Total RNA was isolated using the guanidinium isothiocyanate method, and mRNA isolated using to guanidinium isothiocyanate method, and mRNA isolated using oligo(dT)-cellulose chromatography. First strand cDNA synthesis was completed using a 50-base primer and reverse transcriptase in the presence of 5-methyl dCTP. After second strand synthesis, uneven termini were treated with PTU DNA polymerase and EcoRI adaptors ligated to the blunt ends. The sample was cleaved with XhoI and separated on a Sephacryl S-500 column. Size-fractionated cDNA was precipitated and ligated to HybriZAP arms directionally using EcoRI-XhoI cleaved arms. After packaging, the phagemid vector (pAD-GAL4) was exclased from the HybriZAP vector and plasmid DNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    carlton@tigr.org

/note="Vector: pAD-GAL4; At 20-25% parasitemia, blood was
collected from BALB/CByJ mice infected with Py17XL
parasites, and leukocytes removed by passage over
microcrystalline cellulose collumns. Total RNA was
isolated using the guanidinium isothiocyanate method, and
mRNA isolated using oligo(dT) cellulose chromatography.
First strand cDNA synthesis was completed using a 50-base
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       5-methyl dCTP. After second strand synthesis, uneven termini were treated with Fu DNA polymerase and EcoRI adaptors ligated to the blunt ends. The sample was cleaved with XhoI and separated on a Sephacryl S-500 column. Size-fractionated cDNA was precipitated and ligated to HybriARP arms directionally using EcoRI-XhoI cleaved arms. After packaging, the phagemid vector (pAD-GAL4) was
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Jane Carlton
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      excised from the HybriZAP vector and plasmid DNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            primer and reverse transcriptase in the presence of
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 /clone="PYCLP02"
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              /clone_lib="PyBS"

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          parasites, and leukocytes removed by passage over microcrystalline cellulose collumns. Total RNA was isolated using the guanidinium isothiocyanate method, and mRNA isolated using oligo(dT)-cellulose chromatography. First strand cDNA synthesis was completed using a 50-base primer and reverse transcriptase in the presence of 5-methyl dCTP. After second strand synthesis, uneven termini were treated with Pfu DNA polymerase and EcoRI adaptors ligated to the blunt ends. The sample was cleaved with XhoI and separated on a Sephacryl S-500 column. Size-fractionated cDNA was precipitated and ligated to HybrIZAP arms directionally using EcoRI-XhoI cleaved arms. After packaging, the phagemid vector (pAD-GAL4) was excised from the HybrIZAP vector and plasmid DNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 /dev_stage="Asexual blood stages"

//note="Vector: pAD-CAL4; At 20-25% parasitemia, blood was collected from BALB/CBJJ mice infected with Py17XL microcrystalline cellulose collumns. Total RNA was mrited using the guanidinium isothiocyanate method, and First strand cDNA synthesis was completed using a 50 base fmethyl dCTP. After second strand synthesis, uneven adaptors ligated to the blunt ends. The sample was cleaved strential were treated with Pfu DNA polymerase and EcoRI with XhoI and separated on a sephacryl $5.50 column. HybriZAP arms directionately using EcoRI-XhoI cleaved arms directionately using EcoRI-XhoI cleaved arms directionately using EcoRI-XhoI cleaved arms. excised from the HybriZAP vector and plasmid DNA isolated."

                            Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      5: //SIDS2/gcgdata/geneseq/geneseqp-embl/AA1985.DAT: *

```
cc encoding Saratin, an expression vector comprising the DNA sequence, a constraint of the DNA sequence and cc immunospecific for Saratin, and methods for identifying Saratin agonists cor antagonists. Saratin is useful for treating thromboembolic processes, and for manufacturing a medicament for treating thromboembolic processes. Cc and for manufacturing a medicament for treating thromboembolic diseases. Saratin is also useful for coating artificial surfaces, since use of Saratin renders them cc for coating artificial surfaces, since use of Saratin renders them cc mon-adhesive for cells and prevents the activation of cells. It may also useful for modifying intraocular lenses in order to lessen the cc useful for modifying intraocular lenses in order to lessen the lens material for covalent crosslinking to modify the lens material. The lens material cc is used for refractive anterior or posterior chamber ocular implants, cc which may be implanted into the eye. This new type of coating avoids to be used in the complete of the combination with other problems contributed by stimulated cell growth. In combination with other complete to coating avoids and the coating avoids to the complete of the coating avoids to coating the coating the coating avoids to coating the coating t

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Query Match
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     New Saratin polypeptide and gene isolated from Hirudo medicinalis for blocking platelet adhesion, especially useful for treating or preventing thrombotic diseases, or for manufacturing a medicament for preventing thrombotic diseases, or for manufacturing a medicament for preventing thrombotic diseases.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Saratin is a protein isolated from the saliva of the medicinal leech Hirudo medicinalis. Saratin is an inhibitor of collagen-dependent platelet adhesion. The invention includes polynucleotide sequences
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Claim 7; Page 41; 46pp; English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            thromboembolic diseases
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            helps to completely overcome posterior capsule opacification. The antibody immunospecific for Saratin, as well as Saratin itself, are useful for measuring samples derived from host cell cultures or from a useful subject. The present sequence represents the amino acid sequence for the center of the control of the control
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   This sequence represents the immunophilin FKBP46 from the moth Spodoptera fruglperda. FKBP46 is a novel insect cell nuclear immunophilin, which can be used to study and identify additional immunosuppressive drugs that can be used to study and identify additional immunosuppressive bind to it. Such immunosuppressive agents can be used in treating transplant and tissue graft patients.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Claim 1; Fig 1; 21pp; English.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          (PEKE ) PE CORP NY
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          capable of detecting 1000 or more genes from Drosophila. The invention useful in developmental biology and in elucidating cell signalling and cell-cell interactions in higher eukaryotes for the development of insecticides, therapeutics and pharmaceutical drugs. The invention discloses genomic DNA sequences (ABL16176-ABL30511), expressed DNA discloses (ABL01840-ABL16175) and the encoded proteins sequences (ABL01840-ABL16175) and the encoded proteins
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      _{\rm New} isolated nucleic acid detection reagent for detecting 1000 or more genes from Drosophila and for elucidating cell signalling and cell-cell interactions .

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                The present sequence is a mouse Ice-4 protein sequence. The present sequence was used in a sequence homology comparison with the protein sequences of human Ice-ced 3 homolog (Ich-1) (AAB14253), murine ICE2 (AAB14252) and C. elegans ced-3 (AAB14246). The coding sequence of the present sequence is a member of a family of genes involved in programmed cell death (apoptosis). Ich-1 may play an important role in both the positive and negative regulation of apoptosis. The Ich gene muscular degenerative diseases, myocardial infarcation, stroke, virally induced cell death and aging.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 CC This sequence represents a cDNA encoding murine caspase-12L, a splice CC variant of caspase-12. Caspases are a family of proteins involved in CC the regulation of apoptosis and are synthesised as proforms which are cactivated via cleavage after specific Asp residues. Mammalian cells carried express several caspases, and it is thought that these act in a cells composed caspase-12S (AR32644) or truncated forms of caspase-12L (AR32644) are used for production, recombinantly or in vivo, caspase-12 polypeptides which induce programmed cell death. This is compared to the caspase-12 polypeptides which induce programmed cell death. This is compared to the caspase-12 polypeptides which induce programmed cell death. This is compared to the caspase-12 polypeptides which induce programmed cell death. This is compared to the caspase-12 prophastic liver foci and resistance to chemotherapy), or compared caspase-12 prophastic liver foci and resistance to chemotherapy), or compared caspase-12 prophastic liver foci and resistance to chemotherapy), or compared caspase-12 prophastic liver foci and resistance to chemotherapy), or compared caspase-12 prophastic liver foci and resistance to chemotherapy), or compared caspase-12 prophastic liver foci and resistance to chemotherapy), or compared caspase-12 prophastic liver foci and resistance to chemotherapy), or compared caspase-12 prophastic liver foci and resistance to chemotherapy), or compared caspase-12 prophastic liver foci and resistance to chemotherapy, or compared caspase-12 prophastic liver foci and resistance to chemotherapy, or compared caspase-12 prophastic liver foci and resistance to chemotherapy, or compared caspase-12 prophastic liver foci and resistance to chemotherapy, or compared to the caspase-12 prophastic liver foci and resistance to chemotherapy.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    The present sequence is a mouse Ice-4 protein sequence. The present sequence was used in a sequence homology comparison with the protein sequences of human Ice-ced 3 homolog (Ich-1) (AAB14253), murine sequences of human Ice-ced 3 homolog (Ich-1) (AAB14253), murine ICE2 (AAB14252) and C. elegans ced-3 (AAB14246). The coding sequence of the present sequence is a member of a family of genes involved in programmed present sequence is a member of a family of genes involved in both the cell death (apoptosis). Ich-1 may play an important role in both the positive and negative regulation of apoptosis. The Ich gene may be used positive and negative regulation of apoptosis. The Ich gene may be used in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders characterised by cell death e.g. neural and in gene therapy in disorders chara
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          New human Ich-IL and Ich-Is proteins for negative and positive regulation of programmed cell death and for developing therapeutic methods for diseases and conditions characterized by cell death, e.g. myocardial infarction or stroke \dot{}

                                                                                                                                                                                                                                                                                                         WPI; 2000-679352/66.
The present invention is concerned with methods for identifying compounds useful for modulating caspase-mediated apoptosis. These include the caspase-12 protein shown here. These agents can be used in the treatment

                                                                                                                                                                                         Ich-3 (AAR98464) causes programmed cell death and shows significant homology to mouse interleukin-1 beta converting enzyme (ICE), mouse mich-2 (AAR98461) and human Ich-1 (AAR98462-63). Its sequence was deduced from the Ich-3 gene (AAR931554) isolated from a mouse thymus cDNA library. The protein can be obtd. from host cells contg. vectors that include an Ich-3 coding sequence. It can be used to control the programmed cell death of vertebrate cells, to develop cell control the programmed cell death of vertebrate cells, to develop cell

                                                                                                                                     AAG17789 standard; Protein; 175 AA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          The invention relates to an isolated nucleic acid detection reagent capable of detecting 1000 or more genes from Drosophila. The invention is useful in developmental biology and in elucidating cell signalling and insecticides, therapeutics and pharmaceutical drugs. The invention of discloses genomic DNA sequences (ABLIG176-ABL30511), expressed DNA sequences (ABL01840-ABL10175) and the encoded proteins

The sequence data for this patent did not form part of the printed specification, but was obtained in electronic format directly from WIPO

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     11-MAY-2000
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    The present invention describes proteins and their fragments (I) encoded by chromosome 2 of the human malarial parasite, Plasmodium falciparum. By chromosome 2 of the human malarial parasite, Plasmodium falciparum. Valso described are: (1) nucleotide sequences (II) encoding (I); and (2) and (II) are useful for the development of vaccines against (I) and (II) are useful for the development of vaccines against (I) and polyclonal antisera or a monoclonal p. falciparum infection. (I) and polyclonal antisera or a monoclonal p. falciparum infection (I) and polyclonal antisera or a monoclonal p. falciparum fundopens comprising the sequences of (I), are antibody raised to immunogens comprising the sequences of (I), are antibody raised to immunogens comprising the sequences of (I), are antibody raised to immunogens comprising the sequences of (I), are antibody raised to immunogens comprising the sequences of (I), are antibody raised to immunogens comprising the sequences of (I), are antibody raised to immunogens comprising the sequences of (I), are antibody raised to immunogens comprising the sequences of (I), are antibody raised to immunogens comprising the sequences of (I), are antibody raised to immunogens comprising the sequence of (I), are antibody raised to immunogens comprising the sequence of (I), are antibody raised to immunogens comprising the sequence of (I), and (I) and (I
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              05-NOV-1998;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          proteins encoded by chromosome 2 of the human malarial parasite, plasmodium falciparum, useful as antimalarial vaccines and in the diagnosis of p.falciparum infection –
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Disclosure; Page 283-284; 577pp; English.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                p. falciparum. Sequencing of the plasmodium chromosome 2 and the subsequent identification of proteins encoded by it will help to expand our understanding of parasite biology, a process hampered by the complexity of the parasitic lifecycle, and provide new targets for complexity of the parasitic lifecycle, and provide new targets for
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      vaccine and drug development. Parasite resistance to drugs and mosquito resistance to insecticides have led to a resurgence of malaria in many parts of the world, and there is a pressing need for vaccines and new drugs. AAA70078 to AAA70287 and AAB18144 to AAB18352 represent nucleotide and protein sequences given in the present invention, but which are not
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              specifically mentioned within the specification.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Sequence

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 07-FEB-2001.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            28-JUL-2000; 2000EP-0116126
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    sequence and an oligonucleotide comprising a sequence, where the polynucleotide which comprises a 3'-end sequence, where the combination of oligonucleotide comprises at least 15 nucleotides and the combination of oligonucleotide comprises at least 15 nucleotides and the combination of the 5'-end sequence', are discussed in antisense therapy and the specification. The primer sets can be used in antisense therapy and the specification. The primer set useful for synthesising polynucleotides, in gene therapy. The primers are useful for synthesising polynucleotides, in gene therapy full-length cDNAs. The primers are also useful for the particularly full-length cDNAs. The primers are also useful for the particularly full-length cDNAs. The primers are also useful for the detection and/or diagnosis of the abnormality of the proteins encoded by detection and/or diagnosis of the abnormality of the proteins encoded by detection and/or diagnosis of the primers allow obtaining of the full-length the full-length cDNAs. The primers allow obtaining of the full-length the stall of the stall of the primers and AAH13628 and AAH13633 to AAH13640 to AAH13632 to AAH13632 to AAH13632 to AAH13632 to AAH13632 to AAH13632 AAB95893 represent human amino acid sequences; and AAH13629 to AAH13632 AAB95893 represent human amino acid sequences; and AAH13629 to AAH13632 AAB95893 represent human amino acid sequences; and AAH13630 to the primers are used in the exemplification of the primers 
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               The present invention describes primer sets for synthesising 5602 full-length cDNAs defined in the specification. Where a primer set comprises: (a) an oligo-dT primer and an oligonucleotide complementary to the complementary strand of a polynucleotide which comprises one of the 5602 nucleotide sequences defined in the specification, where the oligonucleotide comprises at least 15 nucleotides; or (b) a combination of a polynucleotide comprise of the specification.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Claim 8; SEQ ID 16999; 2537pp + CD ROM; English
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             and/or diagnosis of the abnormality of the proteins encoded by the full-length cDNAs -

RESULT 1 US-09-989-903-16

Sequence 16, Application US/09989903 Patent No. US20020146804A1

```
GENERAL INFORMATION:

APPLICANT: Alnemri, Emad S.
APPLICANT: Fernandez-Alnemri, Teresa
TITLE OF INVENTION: CASPASE-14, AN APOTOTIC PROTEASE, NUCLEIC ACID ENCODING
TITLE OF INVENTION: AND METHODS OF USE
FILE REFERENCE: 480140.434D1
CURRENT APPLICATION UNMBER: US/09/989,903
CURRENT FILING DATE: 2002-04-11
NUMBER OF SEQ ID NOS: 78
SOFTWARE: Patentin Ver. 2.0
SEQ ID NO 16
LENGTH: 172
TYPE: PRT
ORGANISM: Mus musculus
US-09-989-903-16
                                                                                                                                                           RESULT 2
